

## Mizer Mobile Systems: University Library Application

### The Challenge

A major Canadian University required storage for their private book collection. Space restrictions were a major concern. In addition they needed to fit the collection into limited space with tight budgetary constraints.

### The Solution

This was an ideal application for compact mobile shelving, because the access levels were low. The local dealer capitalized on this by planning only two access aisles for all 25 mobile ranges. This maximized the space available.

Using Standard fixed shelving, the collection would have required 2,358 square feet to store. But using Mizer mobile carriages, the entire collection compacted into 1,189 square feet. A space savings of over 50%.
