

QuickSilver Mobile System: Extra tool Space

The Challenge

Space was a concern for a GMC dealership. They were required to purchase specialty tool kits for each new car model. The tools themselves are very expensive and the dealership needed to lock them up in a secured tool crib. Over the years the space had become very cramped and the idea of expanding the room was not an option.

The Solution

Quicksilver lateral mobiles were used to add extra shelves to this room while still using his previous investment in storage shelving. Our Steel shelves slide left to right **exposing what's behind.** We were able to increase capacity up to 70% along one wall, using existing aisle space.

This solution resulted in the customer having almost twice as much storage without having to renovate.
