

Golf Storage: An Exclusive Solution For Every Situation

The Challenge

An exclusive golf course in California was looking for a way to increase their storage capacity. Due to extremely high storage costs and the growing number of members two major factors needed to be addressed; accessibility for members and higher storage capacity within the same area.

The Solution

For quick access to the golf clubs, back to back Z-Line units with two shelves per side were used on a mobile system. As a result this created 63% more storage space.

The increase in capacity allowed the clubs to be accessed quickly and efficiently. Because all golf bags could be stored in one area, the golf club was able to allocate all extra storage space for their golf carts.
