

Taber Public Library

The Library Dilemma

The Taber Alberta Public Library had outgrown their existing facility. They needed additional collection space, user-specific library furnishings, and specialty shelving to meet the diverse needs of their changing community. It was time for a completely new updated building, with all the latest.

The Solution

The librarian, Helen Jury and her team, worked closely with an expert from Stelterr/Foothills systems of Calgary, to realize the vision they had for the new facility.

Some of the design goals were:

- functionality
- optimization of space
- reorganization of library holdings

Incorporating a combination of Estey Cantilever Shelving and Palmieri Furnishings, the new Taber Public Library emerged as a spacious, bright and inviting community gathering place.

Stelterr Factory Direct is the Exclusive Canadian Authorized Distributor of Estey Cantilever Library Shelving, Gaylord Products and Palmieri furnishings. Foothills Systems is a sales Division of Stelterr, working in Western Canada. We have been planning, advising, and furnishing Great Looking libraries for more than 25 years.
